Standard Specification

Hullform and Construction

All gel coat and glass fibre hand laid with unidirectional, biaxial and woven rovings
Antifouling protection to hull
Bowthruster 11hp
Deep 'V' forward; 18° deadrise aft
Designed by Bernard Olesinski and the Fairline design team
Full length moulded spray deflectors
Hull/deck join bolted and bonded
Integrally moulded engine bearers
Isophthalic gel coat backed by isophthalic resin-rich powder-bound glass mat
The deck incorporates polyurethane foam cores for high strength and excellent thermal insulation
The integral bathing platform gives the boat a longer waterline length for improved performance, particularly at reduced power settings
The propellers are set in semi-tunnels enabling the engines to be located further aft, also reducing draught and improving efficiency by reducing the shaft angle
Transverse and longitudinal strengthening stringers throughout hull
