Beam:	2.55 m (8.37 ft)
Cabins:	0
Berths:	0

Description

EN

The Nimbus Commuter 8 is a versatile, fast, and stylish boat designed for year-round adventure. Built for those who value practicality without sacrificing performance, the C8 features a sleek white hull, Cold Fusion White Mercury Verado V8-250 engine, and Nordic oak interior - plus a saving of over £12,000 on the RRP. With clever use of space, high-spec equipment, and smart connectivity via Nimbus Connect, this is a boat that’s equally at home exploring coastal waters or handling the daily commute with confidence. This 2025 model Nimbus Commuter 8 is on order with the factory but changes can still be made to the specification. Note - library photos may not reflect specification of boat.

Cabin: Inside, the C8 features a warm Nordic oak finish with beige carpets and cabin cushions, creating a comfortable and functional space for overnighting or day trips. The saloon is fitted with Blue Storm cushions and includes a compact galley area with an indoor wash basin and Isotherm CR40 cube fridge for easy refreshment on the move. A Nimbus pillow set is also included, adding a cosy finishing touch.

Cockpit: At the helm, a Simrad NSX 12” plotter provides detailed navigation support, while the Simrad xSonic SS60 thru-hull sonar delivers reliable depth and bottom readings. Communication is handled via a Simrad RS40 VHF with AIS receiver and antenna, enhancing safety and awareness during coastal cruising or busy waterway transits. The dash layout is clean and modern, giving the skipper everything needed at a glance.

Electronics: This boat includes the Nimbus Connect system for remote system monitoring and smart integration, along with reliable onboard power. LED lighting and control features are integrated cleanly for ease of use both underway and at anchor.

Machinery: The Nimbus Commuter 8 is powered by a single Mercury Verado V8-250 XL outboard engine in Cold Fusion White, delivering smooth, confident performance across a range of conditions. The engine is paired with VesselView 403 and Active Trim for responsive handling and real-time data monitoring. The bow eye allows for safe trailing when needed, and combined with the boat's compact size and high spec, the C8 is easy to manage both in and out of the water.
