Beschreibung

EN

The Nimbus Commuter 8 is a versatile, fast, and stylish boat designed for year-round adventure. Built for those who value practicality without sacrificing performance, the C8 features a sleek white hull, Cold Fusion White Mercury Verado V8-250 engine, and Nordic oak interior. With clever use of space, high-spec equipment, and smart connectivity via Nimbus Connect, this is a boat that’s equally at home exploring coastal waters or handling the daily commute with confidence. This 2026 model Nimbus Commuter 8 is on order with the factory but changes can still be made to the specification - call us to find out about our offers. Note - library photos may not reflect specification of boat.

Cabin: Inside, the cabin features a double berth with a warm Nordic oak finish with beige carpets and cushions + hatch to deck, creating a comfortable and functional space for overnighting or day trips. Including a compact port side galley area with an indoor wash basin and Isotherm CR40 cube fridge for easy refreshment on the move. Separate toilet compartment on starboard side with toilet and sink. A Nimbus pillow set is also included, adding a cosy finishing touch.

Cockpit: The dash layout is clean and modern, giving the skipper everything needed at a glance. The saloon features port and starboard side doors and a large aft window, manual sliding roof and windscreen for good all round visibility, access and ventilation. Helm and co-pilot adjustable bolster seats for standing or sitting + aft bench seat with cushions.

Electronics: At the helm, a Simrad NSX 12” plotter provides detailed navigation support, while the Simrad xSonic SS60 thru-hull sonar delivers reliable depth and bottom readings. Communication is handled via a Simrad RS40 VHF with AIS receiver and antenna, enhancing safety and awareness during coastal cruising or busy waterway transits. This boat includes the Nimbus Connect system for remote system monitoring and smart integration, along with reliable onboard power. LED lighting and control features are integrated cleanly for ease of use both underway and at anchor.

Machinery: The Nimbus Commuter 8 is powered by a single Mercury Verado V8-250 XL outboard engine in Cold Fusion White, delivering smooth, confident performance across a range of conditions. The engine is paired with VesselView 403 and Active Trim for responsive handling and real-time data monitoring. The bow eye allows for safe trailing when needed, and combined with the boat's compact size and high spec, the C8 is easy to manage both in and out of the water. Fuel capacity: 240L. Fresh water capacity: 50L. CE Category C8.
